

As a private citizen, I oppose the 'broadcast flag' proposal in front of the FCC for rule making. I believe that the ATSC Digital TV "Broadcast Flag" serves the interests of a narrow minority at the expense of the majority of the public. I was taught to believe that in a democracy, the majority opinion led to laws, and that corporations were to be treated as individuals. Please do not succumb to the politicking and special interests that wish to protect their interests. Do what is proper for a society that has already 'outlawed' illegal behaviors which are to be thwarted by this proposal at the expense of legitimate behaviors.

Thank you.
